

# Agitator

FJB Agitator is a suspended agitator matching pulp chest, using for agitating pulp in different consistency in pulp tower, round pulp chest or square pulp chest.

## Advantages

- Vane adopts advanced design, powerful thrust, sanforizing, the angle can be adjusted according to different pulp and different consistency.
- This can adopt mechanical sealing.
- Make stock more uniform, low energy consumption.

## Technical Data

Model	FJB600	FJB800	FJB1000	FJB1300	FJB1600
Vane Diameter (mm)	600	800	1000	1300	1600
Consistency (%)	$\leq 4.5$				
Chest Volume (m <sup>3</sup> )	20-50	50-80	80-120	100-150	150-250
Motor Power (KW)	5.5-11	5.5-15	11-30	30-55	55-90
